

Support opportunities and potential synergies for German Vietnamese Research Cooperation

Dr. Gerd Rücker
DLR-Project Management Agency

Guiding questions

- 1) Fullfilling research demands in Vietnam would require appropriate support to be efficient and targeted:

→ Do the present research opportunities meet the demands?

- 2) Many German organisations operate in Vietnam in research, education, policy, implementation, industry...

→ How could German organisations benefit from collaborating more intensively with each other and in connection with their VN peers in their demands for fullfilling their objectives (e.g. assessments, services, networks,...)?

→ Where are synergies, what could be changed, what is missing in this STI-Ecoystem?

- 3) Generating high impact from research would require proper support:

→ How could GER and VN scientists strategically organize their research making use of available support opportunities?

Collaboration and Funding Topics

Many and diverse topics offer potential for linkages

Network Structures

Specialised network structures offer potential for collaboration on dedicated issues

Funding Type

Research fellowships for postdoctoral and experienced researchers

Fellowships abroad for postdoctoral researchers, joint calls, international research training groups, collaborative research centres, international scientific events

Student and doctoral student scholarships, statutory projects, supporting SMEs and start-ups in Viet Nam, research and political consultation

Small Grants, Medium Grants, large-volume thematic selection procedures (thematic calls)

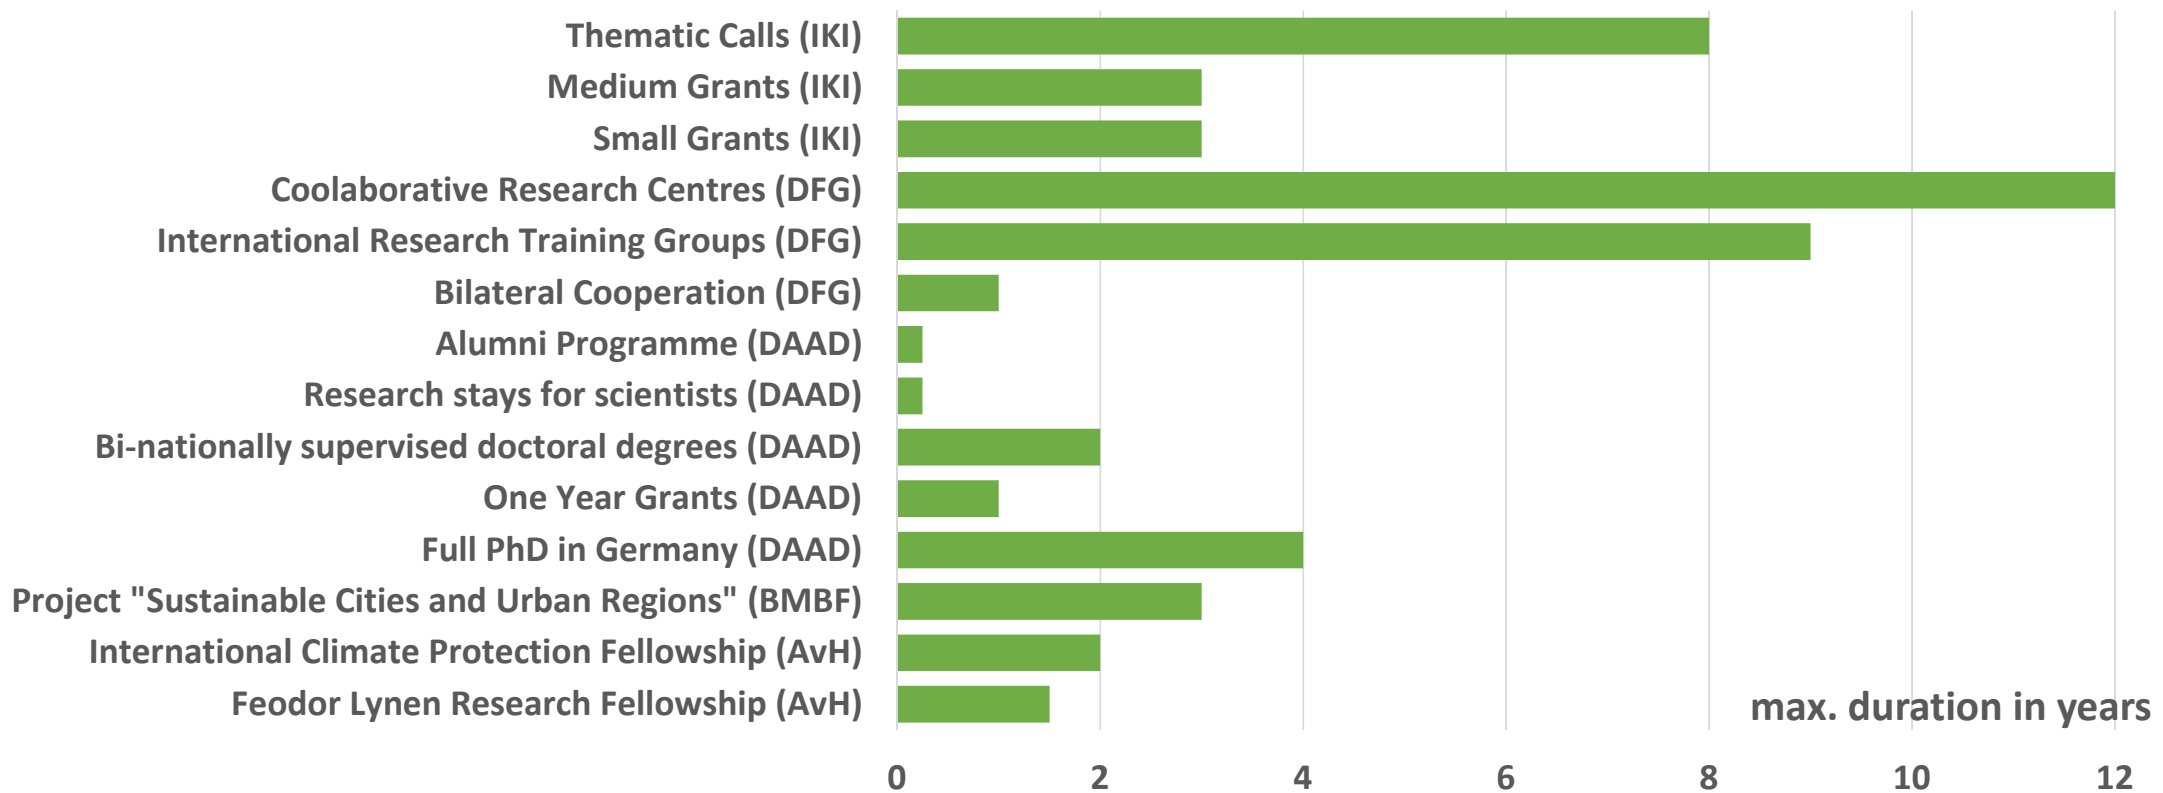

Master scholarships, research grants for PhD, research stays for scientists

Funding of stuff, travelling, workshops, equipment and material

Variety of funding types offer potential for complementary funding

Funding Duration

Different durations of support measures offer potential for long-term funding strategies

Conclusion

Several Potentials for Synergies

- 1) **Thematic linkages** of projects, funding and collaboration measures
- 2) Collaboration in **networks** on dedicated issues
- 3) Complementary **funding**
- 4) Long-term **funding strategies**

How can the Potentials be Leveraged?

Taking an organizational landscape system perspective,
how can **win-win situations** be established for interacting funding and collaborating organisations?

- 1) Which **information** is required?
- 2) Which **communication structure** is suitable?
- 3) Which **Vietnamese organisations** need to be involved?

➔ Let's try a pilot and learn from that.
